PROJECTS / OPEN-SOURCE

Torche Education Blog | Link

React, Next.JS, TailwindCSS, MongoDB, AWS S3

Creating a blog website for the Torche Education company as an internship project for 4 months at Torche Education. This project was carried out by two people as a team.

Following are the explanation points for this project:

- Using Next.js and Tailwind CSS framework.
- There is a search feature based on keywords and categories.
- Implement Progressive Web Apps (PWA) feature.
- Mobile friendly with responsive design.
- There is an admin dashboard page for managing blog posts.
- Database using MongoDB and storage using AWS S3 object storage.
- API development using Next.js as well.
- There is a testing process for the API running process.

Formula Indo Website | Link

React, Next.JS, TailwindCSS, Firebase

Create a website for the purpose of sharing information about Formula 1 in Indonesian. Created in approximately 1 month and is still being managed. Some new features may be added.

Following are the explanation points for this project:

- Using Next.JS and TailwindCSS framework.
- There is a list of Formula 1 race schedules for a season, a list of Formula 1 standing drivers and constructors, and a suggestion form.
- Implement Progressive Web Apps (PWA).
- Responsive website that is mobile friendly.
- Using firebase as database and storage
